ON SUPPLEMENTARY SECURITY INCOME
FROM THE 1976 SURVEY OF INCOME AND EDUCATION

This booklet contains state and national summary tables for families and individuals who reported receipt of Supplementary Security Income (SSI) during calendar year 1975 or during the Spring of 1976. The frequency distributions are based on data drawn from the 1976 Survey of Income and Education. A non-blank entry indicates that at least one person (14 years and older) reported receipt of SSI during calendar 1975 or Spring 1976. SSI may have been in the form of a federal payment or a state or local supplementation. Some families and individuals may have received SSI during 1975 and in the Spring of 1976. Each table is disaggregated into five "kinds of families:"

(1) primary families (PRIM): a family which includes an adult head and other persons related to the head by blood, marriage, or adoption; viz., a wife, dependent children, and other relatives.

(2) sub families (SUB): a married couple with or without children or a single parent with one or more single children under 18 years of age, living in a household and related to, but not including, the head of the household (primary family head).

(3) secondary families (SEC): a family that does not include among its members the head of the household (primary family head) and relatives of the head.

(4) primary individuals (PRIM): a household in which no other person is related to the head; viz., a single individual, determined to be a

the head of household.

(5) secondary individuals (SIND): a person in a household who is not related to any other person in the household.

Each kind of family is also disaggregated by "type of family:" husband/wife families (HW); single male headed families (SM); and single female headed families (SF). Not all combinations of family kind and family type are logically defined. PIND and SIND are consistent only with SM and SF; though listed in each table, PIND and SIND HW families are left blank. PRIM, SUB, and SEC are logically consistent with HW, SM, and SF. A blank table entry for any of these combinations indicates that no families were found in which at least one person received SSI during calendar 1975 or Spring 1976.

The frequency distributions present the number of families or number of individuals in PIND and SIND with a given distribution of persons by age of persons in the family: number of persons 21 years and older (ADLT); number of persons 14 to 20 (K20); and number of children under 14 (K14). K14 is always zero for PIND and SIND entries. FAMS is the sum of sample survey weights for the family (or PIND or SIND).

Table 1 presents a national distribution of SSI recipient families and individuals according to the 1976 Survey of Income and Education. There were about 3.1 million family and individual SSI recipients during calendar 1975 or Spring 1976. About 57 percent were families which included one or more SSI recipients; the remainder were individual SSI recipients.

Three-fifths of the 1.8 million primary families (HW, MH, FH) who had an SSI recipient in calendar 1975 or Spring 1976 had no children present.

* An SSI recipient family includes at least one person over 14 years of age who reported receipt of federal or state and local Supplementary Security Income during calendar 1975 or Spring 1976. An SSI individual reported such income during calendar 1975 or Spring 1976.

Adult/no children families made up about 30 percent of subfamilies and secondary families. The SIE reported 1.3 million individual SSI recipients (PIND, SIND). About three-fourths of these recipients were women.

Table 2 presents state summaries by family kind. State frequency distributions formatted like Table 1 fill out the remainder of this booklet.

* An SSI Recipient Family includes at least one person over 14 years of age who reported receipt of federal or state and local Supplementary Security Income during calendar 1975 or Spring 1976. An SSI individual reported income during calendar 1975 or Spring 1976.

SSI RECIPIENT FAMILIES AND INDIVIDUALS,
BY STATE, FAMILY KIND AND TYPE, AND
DISTRIBUTION OF PERSONS OVER 21 YEARS OF
AGE, 14 TO 20 YEARS OF AGE, AND UNDER
14 YEARS OF AGE.
